 LITHIUM CONTENT IN AUSTRIAN SALINE MOTHER
 LIQUORS. [1963] 5p. (figs. omitted) 13 refs.
 Order from SLA \$1.10 63-14102

Trans. of Mikrochimica Acta (Austria) 1957 [no. 3/4]
 p. 607-612.

DESCRIPTORS: *Lithium, *Salts, *Test methods,
 Spectrophotometers, Chemical analysis.

The lithium content of brine mother liquors may be de-
 termined by the flame photometer after the sodium
 chloride has been removed with hydrogen chloride gas.
 A simplified calibrating process is used, based on the
 addition of known amounts of lithium corresponding to
 an internal standard procedure. The usability of these
 methods is demonstrated by the results of the investi-
 gation of Austrian saltworks mother liquors. (Author)
